

ABSTRACT

The present invention concerns an interlabial pad easy to wear between the labia and provides an interlabial pad of a structure allowing to wear between the labia of a woman easily and appropriately.

- 5 A mini sheet piece (14) is attached to the opposite side to the body side of the an interlabial pad (1) for constituting a pocket (16) for finger insertion and, at the same time, the shape of a finger insertion opening (19a) constituting the entrance of the pocket (16) is made flat in the planar direction of the sheet so that the boll of the finger can be inserted naturally in contact with the face of the sheet.
- 10 In addition, the finger insertion opening (19a) is made to guide to a finger application point (3) appropriate for feeling for a wearing point in between the labia.
